Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicants' Representatives proposed amendments in order to more clearly distinguish the claimed invention over the cited prior arts of record. Specifically, Applicants' Representatives suggested amending "encryption format" to "encryption algorithm." The Examiner mentioned that, although further consideration is necessary, it seems to overcome the Richards reference. The Examiner also mentioned, however, that it may not overcome a reference previously cited (not used) Basawapatna et al., US Patent No.6,598,231 who teach that a different encryption technique may be used depending on whether the data signal is transmitted in analog/digital format in col. 7. Examiner mentioned that these amendments filed in an after-final will most likely require further search and/or consideration. Examiner will review the amendments/remarks when filed.
